**Department:** Captor Belgium

### Tasks & Responsibilities related to the Function

After an individual training you become, as project leader, responsible for the implementation and support of our applications for our customers. You analyze the needs of the customers, propose a project plan, manage change requests and translate the agreed concept towards an operational implementation. Through support and periodic contacts you establish a preferred relationship with the customer.

### Required Skills & Competencies

You have a university degree and you have affinity with ICT. We especially count on your team spirit, your ability to adapt and your organizational competencies. We are looking for a consultant who puts the customer first and who can convince the people he works with. Multilingualism (N/F/E) is a plus.

### Remuneration Package

Working at Captor is working with an energetic and multidisciplinary team with the possibility to work independently and great authority and initiative. The different customers, for whom we implement solutions, give a great variety in the job. You will be part of a Belgian organization with many international contacts. You'll receive a salary according to your experience and a representative company car and other extra legal benefits.

### Contact

If you are interested in this function, put in your application and CV to Captor NV, Dirk Ghysels, Pontbeek 55 1731 Asse-Zellik, or e-mail to <mailto:dg@captorgroup.com>
